Deployment:

We deployed our site on both PythonAnywhere and Heroku, links given below

PythonAnywhere: <https://schedulecu.pythonanywhere.com/>

Heroku - <http://schedulecu.herokuapp.com/>

NOTE: Due to limitations in Heroku's free tier, our site's database will be disabled after Thursday, December 12th. Our database is 12x larger than the free tier allows due to all the data we collected. No guarantees on how the site will behave after this date. Use the pythonanywhere link instead.

Continuous Integration: Travis CI - <https://travis-ci.com/jacobfelknor/schedulecu>
